In response to the after-final amendment filed November 4, 2005, please note the following problems. If corrections are submitted to the fax number above (not the official fax number given in the Office action), the corrections can be incorporated into an examiner's amendment, thus expediting the potential allowance of the case.

- Regarding claim 2, there is no antecedent basis for "the predetermined information".
- Claim 2 is also rejected under 35 U.S.C. 112, second paragraph, because it omits essential elements. Specifically, claim 4 does not describe how "predetermined information" relates to the camera recited in claim 1.
- Regarding claim 3, there is no antecedent basis for "the predetermined information".
- Regarding claim 4, there is no antecedent basis for "the predetermined information".
- For clarity, claim 5 should be modified to replace "comprising a guillotine the processing system" with -- comprising a guillotine, the processing system --.
- For clarity, claim 6 should be modified to replace "the print roll sensor adapted to detect" with -- the print roll sensor, adapted to detect --.
- Regarding claim 33, there is no antecedent basis for "the predetermined information".
